Ever since the first Land Rover vehicle was conceived in 1947, we have built vehicles that challenge what is possible. These in turn have challenged their owners to explore new territories and conquer difficult terrains. Our vehicles epitomise the values of the designers and engineers who have created them. Each one instilled with iconic British design cues, delivering capability with composure. Which is how we continue to break new ground, defy conventions and encourage each other to go further. Land Rover truly enables you to make more of your world, to go above and beyond.

DESIGN

EXTERIOR

With its three classic lines of the lower accent graphic, floating roofline and continuous waistline, the Range Rover is unmistakable. The iconic silhouette is gently tapered and curved, while the use of near-flush glazing and Gloss Black pillars accentuates the roof enhancing its streamlined and elegant form.

The vehicle's fresh and contemporary appearance is complemented by carefully crafted design details that give Range Rover its distinctive character.

First to catch the eye is the very modern interpretation of the side fender vent graphic, which is executed on the surface of the front doors.

Whilst lower down, accent graphics sweep around the body. Optional Adaptive Xenon headlights that swivel to follow the road during night-time driving add to the vehicle's look.

Vehicle shown above and right is Autobiography in Indus Silver with optional features fitted (market dependent).

INTERIOR

Refinement is at the heart of Range Rover.

Its interior gives a sense of calm, indulgent and luxurious comfort. It is beautifully appointed and thoughtfully designed. The broad centre console and the new 10" 21:9 wide format Touchscreen puts essential and intuitive controls within easy reach.

Clean surfaces and the use of soft supple leathers, wood veneers and highly polished finishers help create contemporary, comfortable surroundings.

Delightful to the touch, the type of leather is determined by model choice. It enhances the interior, covering virtually every surface from the seats and instrument panel to the doors and headlining. Vogue SE, Autobiography, SVAutobiography Dynamic and SVAutobiography Long Wheelbase feature Semi-Aniline leather with high-grade hides selected for their exceptional suppleness and natural appearance.

The finish is naturally of the highest order. Tailored twin-needle hand-stitching is used and every aspect is considered; from the length and direction of the stitching, to the spin, thickness and material of the thread. Even the size and shape of the needle is defined.

Interior shown right is Vogue in Espresso/Ivory with Ivory seats and Figured Macassar veneer with optional features fitted (market dependent).

UNCOMPROMISING ATTENTION TO DETAIL

The focus on impeccable craftsmanship is well illustrated by the authentic metal details, which are cool to the touch and stunning to look at, and provide a stylish contrast to the opulent leather and veneer surfaces.

Striking examples include the bold Brushed Aluminium pillars each side of the centre console, the rotary shifter and the distinctive air vents with each blade highlighted with a keyline of Satin Chrome.

Typifying the attention to detail, the aluminium finish on the centre console is created using a unique approach which involves the aluminium material passing through more than 20 distinct processes to provide an exquisitely crafted finish.

Interior shown left and above is SVAutobiography Long Wheelbase in Navy/Ivory with Ivory seats and Figured Macassar veneer.

LOADSPACE CAPACITY

Whether you're heading off to the opera for the weekend or Geneva and on to Verbier for a week's skiing, Range Rover has ample loadspace. In fact, there are 909 litres available or, when the rear seats are stored flat, 2,030 litres (2,345 litres on Long Wheelbase).

Even though the vehicle enjoys the most exemplary levels of refinement, it's always ready to accommodate your luggage or even bulkier loads with ease.

LONG WHEELBASE

EXTERIOR

Range Rover Long Wheelbase is instantly recognisable, superbly engineered and beautifully appointed. This body style has unique features such as a distinctive 'L' badge mounted behind each front wheel arch and Narvik Black mirror caps as standard. And though the exterior length has been extended by 200mm, its silhouette does not appear any different.

Vehicle shown left is Autobiography Long Wheelbase in Loire Blue with optional features fitted (market dependent).

SPECIFICATION

INTERIOR

The overall sense of unparalleled comfort is realised in Range Rover Long Wheelbase, providing an extra 186mm in the second row and affording rear passengers an extended recline of some 17 degrees.

Passenger Seat Away can also slide the front passenger seat forward to provide even greater levels of comfort and space.

This body style has an additional deep illuminated stowage compartment in the centre console for rear seat occupants and rear door map pockets, which are fitted to both bench and Rear Executive Class seats. For added convenience, this vehicle is equipped with powered side door blinds and a panoramic sunroof as standard.

Interior shown above and right is Autobiography in Navy/Cirrus with Cirrus seats and Grand Black veneer with optional features fitted (market dependent).

SPECIAL VEHICLE OPERATIONS

Designed and engineered by Special Vehicle Operations (SVO) – Land Rover's centre of excellence for bespoke commissions, luxury editions and performance models – the SVAutobiography Dynamic and SVAutobiography Long Wheelbase offer the pinnacle in performance and luxury.

SVAutobiography Dynamic has the power and agility to match its distinctive exterior. The lower stance hints at the performance contained within this special Range Rover. SVAutobiography Dynamic maximises driver enjoyment of the road ahead whilst simultaneously delivering all the luxury you would expect from the performance Range Rover.

SVAutobiography Long Wheelbase is our most luxurious and alluring Range Rover ever. Exclusively available in Long Wheelbase, it offers unrivalled luxury, comfort and refinement – the ultimate Range Rover.

The craftsmanship and expertise of SVO are apparent in the celebrated design, precision engineering and unrivalled levels of refinement that have come together to create the SVAutobiography Dynamic and SVAutobiography Long Wheelbase.

Vehicle shown left is SVAutobiography Long Wheelbase with Duo Tone paint in Corris Grey and Santorini Black with optional features fitted (market dependent).

Managing Director of Special Vehicle Operations.

SVAUTOBIOGRAPHY Long Wheelbase

EXTERIOR

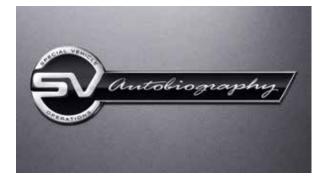

Craftsmanship never goes out of style and over 45 years of expertise in designing Range Rover is manifested in each SVAutobiography Long Wheelbase.

Every tailored aspect whispers elegance and attention to detail. Approaching the front, each vehicle is crafted with luxury design cues such as the unique front grille and 'Range Rover' front and rear script with a dark knurled effect finish edged in Bright Chrome.

The SVAutobiography Long Wheelbase retains a poised stance, even with the 200mm extra length. Body-coloured side vent graphics are punctuated by Bright Chrome inserts, with Bright Chrome door handle surrounds and tailgate finisher. Unique 21" and 22" wheel choices complete the luxury design.

To reflect your personal taste, the option of exterior Duo Tone paint allows customers to specify the vehicle in one of 25 exterior colours* below the waistline, with a Santorini Black finish above the waistline to produce a prestigious appearance.

*Duo Tone paint available on SVAutobiography Long Wheelbase. Please see page 83.

DRIVING TECHNOLOGY

TESTING

Before any vehicle can carry the Land Rover badge, it must complete a series of rigorous tests to establish the very highest levels of luxury, performance and capability.

SUSPENSION

You're unlikely to push any Land Rover harder than we have. To guarantee an unrivalled breadth of dynamic capability, both on and off-road, the vehicles have been exposed to ten years of the most extreme driving pressures in a fraction of the time using our state-of-the-art test rig.

WIND SPEED

In our climate chambers we can recreate some of the most challenging wind conditions Range Rover will face. Not just 180kph crosswinds, but high ambient temperatures and low airflow situations. Only by pushing all systems to their limits do we develop true reliability.

HOT AND COLD CLIMATE

In real world environments and our climate chambers, we freeze vehicles to -40°C and bake them to 50°C. Key functions and systems are then scrutinised to our exacting standards. So even in the most remote locations, comfort and peace of mind is never far away.

OFF-ROAD

From the icy proving grounds of Arjeplog, Sweden, to Dubai's unforgiving desert sands, we ensure our legendary all-terrain performance is innate in every vehicle. Prototypes are developed across approximately 8,500km of the most demanding off-road routes.

SEMI-ANECHOIC CHAMBER

In the 'neutral sound' of our semi-anechoic chamber we precisely expose the cabin to a range of frequencies and vibrations, making certain that Range Rover sounds refined at every speed and across every surface.

MONSOON

Using our monsoon simulator, we drench our vehicles with some 85,000 litres of specially dyed water, while tilting it by as much as 45°, checking for even the slightest leak with UV lights. Ensuring each vehicle can enter and exit a body of water without a single droplet entering the cabin.

TERRAIN RESPONSE

With an all-aluminium body and true Land Rover capability at its heart, the Range Rover delivers incredible off-road performance.

Our unique Terrain Response 2* system is designed to monitor driving conditions and automatically optimise driveability and traction by adapting the responses of the vehicle's engine, gearbox, centre differential and chassis systems to match the demands of the terrain.

Even when it is not in Auto Mode, Terrain Response 2 provides the driver with additional input, such as advising when to select low range or the off-road ride height. There are five Terrain Response settings: General Driving, Grass/Gravel/Snow, Mud and Ruts, Sand, and Rock Crawl.

ALL TERRAIN PROGRESS CONTROL

All Terrain Progress Control (ATPC)** is a stateof-the art system that enables drivers to set and maintain a steady speed in challenging conditions.

Operating like a cruise control system, it functions at very low speeds between 2kph and 30kph, enabling the driver to maintain full concentration on steering and finding a path through obstacles.

Developed by Land Rover's industry-leading all-terrain specialists, the system works seamlessly alongside the Terrain Response 2 and 4 Wheel Drive (4WD) traction and braking systems.

Once ATPC is activated, the standard steering wheel +/- cruise control buttons are used to set the speed. Brake and accelerator pedals can still override the chosen settings, with gentle braking achieving a reduction in speed.

LOW TRACTION LAUNCH

Range Rover features a dedicated launch functionality, which enables the vehicle to pull away smoothly and easily, even on tricky low-friction surfaces like ice, snow or wet grass.

ELECTRONIC SUSPENSION

A sure-footed, composed drive is completed by the latest 4-corner air suspension which provides exceptional wheel articulation and poise.

Capable of taking on tough situations, this system is designed to keep the Range Rover composed and stable no matter how rough the terrain. For unprecedented ride quality, it switches heights seamlessly when necessary.

DRIVING TECHNOLOGY 31

ENGINES

HILL DESCENT CONTROL

To complement the Terrain Response system, Range Rover can also call upon a unique suite of all-terrain technologies to help maximise performance and safety, including Hill Descent Control (HDC).

Hill Descent Control assists with controlled descents of difficult slopes by maintaining a constant speed and applying braking separately to each wheel.

Hill Start Assist ensures you do not roll backwards as you pull away on an incline.

The vehicle also utilises Gradient Release Control (GRC) which is designed to prevent the vehicle 'running away' on a steep incline when the driver inadvertently releases the brake.

DESIGN

WADE SENSING

Optional Wade Sensing assists the driver when crossing streams, fords and flooded roads, by using sensors in the door mirrors and alerting the driver if the water is too deep. This feature provides real-time pictorial wading information, including the depth of the water in relation to the vehicle, as well as maximum wading capability of the vehicle via the Touchscreen.

Range Rover delivers impressive wading depth of 900mm, partly enabled by an air intake system. In addition, the vehicle's angle is displayed via the Touchscreen to show when it is entering deeper or shallower water; this aspect of the feature is particularly beneficial in the dark when it is difficult to predict the wading depth. Finally, as you leave the water, you will find the departure angles are second to none.

Feature availability varies by market, engine and model. Please see the accompanying Specification and Price Guide for feature availability within market or contact your local Land Rover Retailer for more information. Vehicle shown right is Autobiography in Indus Silver with optional features fitted (market dependent).

DRIVING TECHNOLOGY 33

SPECIFICATION

FIND A RETAILER

BUILD YOUR OWN

SPECIFICATION

FIND A RETAILER **BUILD YOUR OWN**

ADAPTIVE DYNAMICS

Adaptive Dynamics makes the miles go by virtually unnoticed. The system monitors vehicle movements up to 500 times a second, reacting to driver or road inputs almost instantaneously to give greater control and minimise body movement ensuring a composed, flat ride.

The system even senses off-road conditions, and optimises damping accordingly so driver and passengers arrive at their destination refreshed and relaxed.

DYNAMIC RESPONSE

Dynamic Response* improves vehicle handling and occupant comfort by reducing the amount of body lean during cornering.

The latest two channel system is capable of controlling the front and rear axles independently, allowing it to be tuned to deliver increased low-speed agility, along with enhanced high-speed stability and greater steering precision.

This feature also aids off-road capability. If the system detects off-road conditions, the control module reduces the level of roll compensation and actively manages the body roll rate, allowing improved passenger comfort and body composure at low speeds.

1 UNADJUSTED LATERAL BODY LEAN

2 | CORRECTED LATERAL BODY LEAN

*Only available on SDV8 and V8 Supercharged. Vehicle shown left and above is Autobiography Long Wheelbase in Loire Blue with optional features fitted (market dependent).

COMMAND DRIVING POSITION

Range Rover's drive is confident and measured with the legendary Command Driving Position placing the driver in an elevated, upright seating position. This offers a reassuring view of the vehicle and its surroundings. The sense of control offered by the elevated driving position is enhanced by the vehicle's outboard seating location with clear visibility to the side, and outstanding forward visibility over the characteristic sunken profile of the bonnet.

FULL THIN FILM TRANSISTOR (TFT) INSTRUMENT PANEL

The 12.3" virtual instrument panel uses high-resolution display technology and colour graphics for clear communication of the main vehicle functions and data, including full screen navigation. With elegant virtual dials resembling 3D Chrome it can be tailored to display only information that is relevant to the current driving situation.

TRAFFIC SIGN RECOGNITION WITH INTELLIGENT SPEED LIMITER

Traffic Sign Recognition keeps you fully informed by displaying particular traffic signs in the instrument cluster where they can easily be seen, and as part of Head-up Display when fitted. The system is capable of detecting variable speed limits and where it exists, navigation data is used to increase its effectiveness. This feature can also display overtaking restrictions.

When activated, Intelligent Speed Limiter uses Traffic Sign Recognition information to adjust your vehicle's speed accordingly.

HEAD-UP DISPLAY

Head-up Display is an option that presents key vehicle data such as road speed, gear position and navigation directions on the windscreen, without distraction or the need for you to take your eye off the road.

The innovative laser system is more robust against issues such as 'washout' – the effect that the glare from sunlight has on inferior LED-based systems. The feature can be turned on and off dependent on driver preference.

Feature availability varies by market, engine and model. Please see the accompanying Specification and Price Guide for feature availability within market or contact your local Land Rover Retailer for more information.

Image shown left is Autobiography Long Wheelbase in Santorini Black with optional features fitted (market dependent).

DRIVER ASSISTANCE 37

SPECIFICATION

BUILD YOUR OWN

DRIVING AIDS

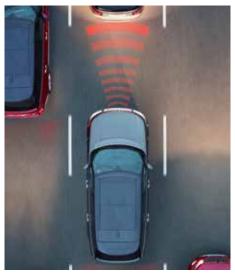

ABOVE & BEYOND

Range Rover has a wealth of driving aids on hand to give you and your passengers an even more sure-footed drive. Featuring the most innovative thinking, engineering and technologies, these features will help you manage most traffic, motorway, road and even night-time driving situations with ease.

LANE KEEP ASSIST* AND DRIVER CONDITION MONITOR**

Lane Keep Assist detects when your vehicle is unintentionally drifting out of your lane, and gently steers you back. Driver Condition Monitor knows if you're starting to feel drowsy and gives you an early warning when you need to take a break.

ADAPTIVE CRUISE CONTROL WITH QUEUE ASSIST AND INTELLIGENT EMERGENCY BRAKING

When you're cruising on the motorway or travelling in slow-moving traffic, this system will keep your vehicle a safe distance from the one in front should it slow or stop. When the vehicle speeds up again, so does Range Rover. If a collision is unavoidable, Adaptive Cruise Control will engage Intelligent Emergency Braking. This system can help reduce injuries and damage by automatically applying the brakes.

AUTONOMOUS EMERGENCY BRAKING

Functioning at moderate speeds, if a potential collision is detected, this system displays a forward collision warning, giving you time to take action. If a collision is still anticipated and you have taken no action, this system will apply the brakes to help reduce the severity of the possible impact.

BLIND SPOT MONITOR WITH REVERSE TRAFFIC DETECTION**

Blind Spot Monitor alerts you to vehicles in, or quickly approaching, your blind spot, through a small warning light in the corresponding door mirror. Reverse Traffic Detection warns you of hazards approaching from either side of your vehicle, through both audible and visual warnings so you know what's behind you even when the view is obstructed. Optional Blind Spot Assist with Reverse Traffic Detection is also available*.

*Available with Drive Pro Pack **Available with Drive Pack.

PARKING AIDS

Parking your vehicle in a busy town or city has never been a particularly simple and straightforward manoeuvre, which is why Range Rover features a raft of aids to help you reverse and park with the greatest of confidence, even when you're negotiating the tightest of spaces.

PARK ASSIST - PARALLEL PARK, PARKING EXIT AND PERPENDICULAR PARK

Our Park Assist system makes parallel and perpendicular parking easier than ever by steering your vehicle into a suitable space. You just have to select the appropriate gear and control the vehicle's speed. Park Assist will also steer you out of a space, taking all of the stress out of parking. Graphics and notifications guide you through the manoeuvres.

SURROUND CAMERA SYSTEM

Giving a 360° exterior view via the Touchscreen, this helps with various manoeuvres from parking by a kerb to getting in and out of tight spaces and junctions.

REAR VIEW CAMERA

To make parking in tight spots simpler, lines to represent the vehicle's outer perimeter and predicted path are superimposed on the rearward image displayed on your Touchscreen.

ENGINES

SPECIFICATION

BUILD YOUR OWN

TOWING AIDS

With a towing capacity of up to 3,500kg* and by incorporating tailored technologies, Range Rover can handle the most demanding of tasks.

ELECTRICALLY DEPLOYABLE TOW BAR

The optional electrically deployable tow bar is stowed discreetly behind the bumper and deploys / stores in 12 seconds with one touch of a button. It is sensitive to obstructions and will stow automatically if necessary.

TOW HITCH ASSIST

Tow Hitch Assist makes coupling a trailer to the vehicle much easier by helping you visualise the hitching process; it displays the predicted path of the vehicle tow ball towards the trailer tow bar on the Touchscreen.

TOW ASSIST

On the road, the Tow Assist feature helps with reversing by predicting the trailer's direction. You can even choose your trailer's width for precise guidelines displayed on the Touchscreen. Standard with Surround Camera System.

ADVANCED TOW ASSIST

Advanced Tow Assist allows you to control the direction of your trailer when reversing by using the rotary Terrain Response 2 controller. The optional system will control the vehicle's steering to achieve the desired trailer trajectory. The Touchscreen will display the current and desired trailer trajectory.

TRAILER STABILITY ASSIST

Trailer Stability Assist (TSA) monitors the vehicle to detect movements in the trailer and then uses selective braking to help correct potentially hazardous situations.

SURROUND CAMERA SYSTEM

For a complete, all-round view, the optional Surround Camera System incorporating T-Junction View helps to see everything clearly on the high-resolution full colour Touchscreen. Using four digital cameras discreetly placed around the vehicle, the system provides an almost complete 360° view including a birds-eye overhead view. It is perfect for more complex driving assignments such as towing a yacht or a horsebox.

Along with the ability to display several different views at the same time, this technology can also zoom and pan, ensuring objects and angles, normally below the line of sight, can be seen.

*3,000kg limit on SDV6 Hybrid Diesel, SVAutobiography Dynamic and SVAutobiography Long Wheelbase V8 Supercharged.

Feature availability varies by market, engine and model. Please see the accompanying Specification and Price Guide for feature availability within market or contact your local Land Rover Retailer for more information.

MERIDIAN™ SOUND SYSTEMS

Meridian products offer the very best in British engineering and design. Just like Land Rover, it is an intuitive and personal experience. Meridian sound masters have employed years of psychoacoustic research to enable you to experience music in a new dimension.

MERIDIAN REFERENCE SOUND SYSTEM (1700W)

The exceptional quality of the Meridian Reference Sound System brings a concert hall experience into the Range Rover.

28 speakers and a dual channel subwoofer, on the 1700W system, ensure you hear everything from the thunderous rumble of bass, to the reedy whisper of a clarinet with a purity that you feel as well as hear.

Meridian Trifield 3D* technology provides greater control over the content of the surround and side channels, as well as additional signal feeds for height speakers, delivering a personal, realistic three-dimensional listening experience in every seat.

MERIDIAN SURROUND SOUND SYSTEM (825W)

This 825W system has 18 speakers and 16 channels, and a dual channel subwoofer, that are placed in ideal positions around the vehicle.

The system also incorporates Meridian Trifield technology to create a concert-like experience for all occupants.

MERIDIAN SOUND SYSTEM (380W)

This 380W system has 12 speakers and 12 channels, and a dual channel subwoofer, for highly optimised sound quality.

Meridian is a registered trademark of Meridian Audio Ltd.
*Trifield and the "three fields" device is a trademark of Trifield Productions Ltd.
Feature availability varies by market, engine and model. Please see the accompanying Specification and Price Guide for feature availability within market or contact your local Land Rover Retailer for more information. Interior shown left is SVAutobiography Long Wheelbase in Navy/Ivory.
Vehicle shown right is Autobiography in Aruba with Ebony/Ivory interior with Ivory seats with optional features fitted (market dependent).

SEAT COMFORT

The optional massage seats feature five programmes and are available for driver and passenger. Both front and rear seats have the option of winged headrests and rear seat recline is standard on all vehicles.

Driver and Front Passenger Upper Seat Articulation is an optional feature that allows the driver and front passenger to adjust the upper part of their seats, providing an extra level of comfort and functionality. Other seat functionality options include adjustable bolsters, 4-way lumbar and climate seats.

PASSENGER SEAT AWAY

The rear passengers can control the movement of their own seat and the front passenger seat with the touch of a button. This allows for forward and backward movements of the front seat.

Enhanced Passenger Seat Away gives full control from the rear centre console, including tilt, and is only available on Rear Executive Class seats.

REAR EXECUTIVE CLASS SEATS

For pure indulgence and refinement in an SUV, nothing comes close.

With the SVAutobiography Long Wheelbase*, Autobiography and Vogue SE models you can choose Rear Executive Class seating. The ultimate in comfort, these two individual seats feature memory, powered headrest, rear centre console armrest, cushion adjustments, massage seats and power recline.

The individual seats are separated by an elegant console that houses the controls and an optional cooler compartment.

COMFORT FOR ALL

CLIMATE CONTROL

To ensure that the interior is maintained at the perfect temperature, whatever the weather outside, Range Rover features a climate control system which is based on class-leading technology. The result of an incredibly rigorous development programme, the system has been tested in real-world conditions in temperatures ranging from -40 to 50°C.

Two versions are available: a three-zone system, featuring separate temperature controls for driver, front passenger and rear seats, or the premium four-zone system, which has separate climate controls for driver, front passenger and each side of the rear cabin.

With its independent heating and cooling capability, the four-zone system offers a significant improvement in rear seat luxury, with multiple outlets at face, foot and hip level.

REMOTE PARK HEAT WITH TIMED CLIMATE

Optional Remote Park Heat with Timed Climate enables you to pre-heat or ventilate the vehicle with remote control and seven-day timer.

This pre-heats the engine, channelling residual heat into the cabin, so the vehicle is warm and comfortable by the time you need to leave. It can be activated immediately by remote control, or pre-programmed through the Touchscreen to ensure it is ready for your regular morning departure time.

CONFIGURABLE INTERIOR MOOD LIGHTING

Passengers can change the interior lighting to suit their tastes. There is a palette of ten colours to choose from and simply operated variable brightness controls can help create the desired mood. The clean, elegant lines and premium materials of the interior are highlighted by carefully detailed LED mood lighting that brings the cabin alive at night. Available as an option.

PANORAMIC ROOF

Flooding the interior with light, the optional fixed or sliding panoramic roof enhances the feeling of space and a connection to the world outside. Yet, at the touch of a button, the driver and passengers can feel cocooned once more as the full-length power blind glides into place.

Feature availability varies by market, engine and model. Please see the accompanying Specification and Price Guide for feature availability within market or contact your local Land Rover Retailer for more information. Interior shown left is Autobiography in Espresso/Ivory with Ivory seats and sliding panoramic roof with optional features fitted (market dependent).

BUILD YOUR OWN

COMFORT FOR ALL

REAR SEAT ENTERTAINMENT

The optional Rear Seat Entertainment System provides either 8" screens built in to the headrest or 10" high-definition seat mounted articulating screens.

'Journey Status', a navigation summary screen which displays a pop-up for the rear occupant detailing the time and distance to destination, is also included. Both systems come with a pair of WhiteFire® digital wireless headphones and HDMI, Mobile Hi-Definition Link and USB connections.

AUTOMATIC ACCESS HEIGHT

Attention to detail is everywhere you look and in everything you touch. For instance, the Automatic Access Height feature lowers the vehicle with precision by up to 50mm, for easier entry and exit when parked. Arriving in style at any function has never been more relaxed.

SPLIT TAILGATE

The split tailgate is distinctly Range Rover. Its electrically operated upper and lower tailgates* help provide a platform for social and sporting events coupled with greater protection from the elements. The upper and lower tailgate can be opened independently using the buttons on the tailgate, or they can be simultaneously opened or closed using the key fob, whilst the upper tailgate can be operated from a switch on the dash.

POWERED GESTURE TAILGATE*

This feature adds practicality and makes life with your Range Rover even easier. Electronically operated, simply by performing a smooth upward movement of the foot beneath the sensor, powered gesture tailgate enables the driver to operate the tailgate (both to open and close) from the kerbside without needing to physically touch either the vehicle or the key fob. And as the system is compatible with accessory towing solutions, you can still open and close the tailgate with the least amount of fuss.

*Option on HSE.

WhiteFire® is a registered trademark of Unwired Technology LLC and any use of such marks by Land Rover is under licence. Feature availability varies by market, engine and model. Please see the accompanying Specification and Price Guide for feature availability within market or contact your local Land Rover Retailer for more information.

ENGINES

8-SPEED AUTOMATIC TRANSMISSION

All petrol and diesel engines in the Range Rover are paired with the advanced electronically controlled ZF 8-speed Automatic Transmission, which has been tuned by Land Rover engineers to combine silky-smooth shifting with exceptionally rapid response. With eight closely spaced ratios, gear changes are almost imperceptible, with each shift completed in just 200 milliseconds.

Controls include steering wheel-mounted paddle shift as standard, enabling the driver to take control of gear shifting manually.

The transmission accepts multiple downshifts, maintaining an absolutely smooth transition between ratios. The optimised lightweight 8-speed Automatic Transmission is the perfect partner to the torque-rich petrol and diesel engines, and contributes to their fuel efficiency.

The transmission is tuned to select torque converter lock-up as early as possible to reduce slip and energy loss. Transmission Idle Control disengages 70 percent of the drive when the vehicle is stationary and the engine is idling in Drive, significantly reducing fuel consumption in urban conditions.

In cold conditions, the transmission selects a lower gear to promote fast warm up and get the engine up to its efficient operating temperature as soon as possible.

DIESEL ENGINES

TDV6 258PS

With a substantial maximum torque of 600Nm, the TDV6 is capable of refined and smoothly responsive performance, sweeping from 0-100kph in just 7.9 seconds.

The engine uses an eight-nozzle low-flow injector designed for more precise injection and improved fuel atomisation. The intake system with twin intercoolers ensures charge cooling, and the engine features the latest tandem solenoid intelligent Stop/Start system to reduce fuel consumption and emissions.

SDV8 339PS

The SDV8 Diesel was designed exclusively for the Range Rover, with 339PS of power the 4.4 litre 'super-diesel' combines huge reserves of performance with impressively low emissions and unparalleled levels of refinement.

With a staggering 740Nm produced between 1,750 and 2,250rpm, the SDV8 delivers completely effortless acceleration, surging from 0-100kph in 6.9 seconds and impressive fuel efficiency reflected in CO_2 emissions from as low as 219g/km.

The SDV8 achieves its incomparable blend of supreme driveability and refinement through advanced diesel technologies, most notably the innovative parallel sequential turbocharging concept which delivers outstanding performance and responsiveness throughout the rev range. The engine also features an Intelligent Stop/Start system to reduce fuel consumption and emissions.

CO

PETROL ENGINES

V6 SUPERCHARGED 340PS

A Roots-type twin vortex supercharger is mounted in the 'V' between the two rows of cylinders for compact dimensions. Supercharging provides linear delivery of power and maximises responsiveness. This results in performance matching much larger engines, while optimising economy and reducing emissions. The engine also features dual independent variable cam timing to vary inlet and exhaust valve operation, working alongside lightweight pistons with ultra-low friction piston rings, for increased performance and efficiency. For added refinement there is a twin, contra-rotating balancer shaft system.

V6 SUPERCHARGED 380PS

The powerful V6 Supercharged 380PS delivers an additional 40PS and can accelerate from 0-100kph in 7.3 seconds.

V8 SUPERCHARGED 510PS

With huge reserves of power and torque inherent in this configuration, an indication of the performance on offer is reflected in the 0-100kph time of 5.4 seconds. This is achieved in the most refined and precise manner possible.

The V8 has a compact and lightweight all-aluminium design, with class-leading low levels of internal friction. The engine has been optimised around a state-of-the-art Bosch engine management system. This features high-pressure direct injection with an industry-leading centrally mounted, multi-hole, spray-guided injection system.

The 510PS engine is fitted with a sixth generation, Twin Vortex System (TVS) supercharger that offers superior thermodynamic efficiency and extremely refined noise levels.

V8 SUPERCHARGED 550PS

Exclusive to SVAutobiography Dynamic and SVAutobiography Long Wheelbase. The V8 Supercharged engine delivers 550PS and 680Nm of torque compared with the V8 Supercharged engine output of 510PS and 625Nm, an increase of 40PS and 55Nm. So you enjoy a more responsive, intuitive drive.

This breathtaking increase in performance has been enabled by a recalibration of the engine and its management system to increase maximum available boost pressure. Maximum torque is delivered at 3,500-4,000rpm.

CO₂

	ACCELERATION 0-100KPH (SECONDS)	TOP SPEED (KPH)	CO ₂ EMISSIONS (G/KM)

HYBRID

Range Rover Hybrid was the first diesel SUV of its kind in the world. It is designed and engineered to deliver class-leading capability and versatility. By fully integrating the hybrid technologies into the chassis, nothing is lost in ground clearance, approach and departure angles or the 900mm wading depth. The vehicle truly is 100% Hybrid, 100% Land Rover.

A lithium-ion battery pack is mounted under the floor of the vehicle to avoid any impact on loadspace or passenger accommodation. It is protected by a boron steel cradle to ensure the vehicle retains its full off-road breadth of capability.

Attention to detail is at the very heart of Land Rover. That is why even the alloy wheels on Range Rover Hybrid have been designed for increased efficiency. The design features spokes that are aerodynamically shaped so, as they move through the air, they require less power to keep them moving. To finish, the vehicle is specified with a unique Hybrid badge that is located on the side vent.

Select from four Hybrid driving modes to tailor the vehicle's performance to your requirements.

Electric Vehicle (EV) On Mode: Optimises hybrid battery power and is whisper quiet enhancing the refinement around town or peaceful villages.

Electric Vehicle (EV) Off Mode: Enables the vehicle's default setting where the hybrid system selects the most efficient combination of diesel and electric power to meet the power and torque required.

Sport Mode: Gives full access to the vehicle's performance, comparable to the SDV8. The throttle response becomes more immediate with torque triggered from less pedal pressure, ideal for when additional power is required.

Auto Stop/Start Off Mode: Increases charging opportunities as this option means the engine runs continuously, inhibiting the Stop/Start System.

Range Rover Hybrid has been tested on the most demanding terrains, rigs and under the same extremes as every Land Rover. Hybrid technologies deliver impressive efficiencies.

The 3.0 litre SDV6 Diesel engine with a 35kW electric motor generates the same performance as the SDV8 Diesel but with CO_2 emissions from only 164g/km, 10% lower (18g/km less) than the TDV6 engine.

Innovative engineering ensures the transmission of energy between battery and engine is seamless. This energy is created by the Regenerative Braking Process, through electro-hydraulic brakes on the rear axle that capture and store kinetic energy in the battery, normally lost through braking.

This is then used to power the electric motor and ensures that torque is instantly available on demand.

BODY AND CHASSIS

ALL-ALUMINIUM BODY

WORLD'S FIRST SUV WITH LIGHTWEIGHT ALUMINIUM CONSTRUCTION

Range Rover is the world's first SUV to feature an advanced all-aluminium body structure making it lighter, more fuel efficient and sustainable.

Not only the lightest in its class by a significant margin, the aluminium structure is incredibly strong too. The body has been engineered to withstand the same off-road impacts as all Land Rovers.

The joints in the shell are riveted and bonded together using techniques originally developed in the aerospace industry and adapted for automotive use by Land Rover. This structure means that traditional energy intensive construction methods such as spot welding are not required.

STATE-OF-THE-ART LIGHTWEIGHT SUSPENSION ARCHITECTURE

Another key factor in the driving capability of the Range Rover is the lightweight suspension architecture. The suspension systems use a clean sheet design which promises to deliver best-inclass vehicle dynamics.

Primarily constructed from lightweight aluminium components, the suspension concept is fully independent, with a wide-spaced double-wishbone design at the front and an advanced multi-link layout at the rear.

The lightweight chassis architecture is combined with four-corner air suspension to optimise the vehicle's versatility both on and off-road. The air springs offer variable ride height, and are cross-linked for maximum axle articulation.

To achieve superior performance, both in terms of ride quality and the ability to change swiftly between the different ride heights, the air suspension hardware has been completely re-engineered. The characteristic Range Rover ride quality is refined through the fitment of low-hysteresis front air springs, which are able to absorb small irregularities more effectively. The springs use a thinner, suppler material, which is protected by a metal casing.

Vehicle shown right is Autobiography in Indus Silver with optional features fitted (market dependent).

SAFETY

5* EURO NCAP RATING

Range Rover meets and exceeds the most stringent global safety standards and was awarded the maximum five star safety rating from Euro NCAP when tested in 2012. Its optimised aluminium body structure protects occupants using an incredibly strong and stable safety cell, which is complemented by a comprehensive system of airbags and restraints. The crash structure is extensively optimised using computer simulation tools, which allows engineers to conduct a significant number of 'virtual' crash tests long before physical prototypes are available. Vehicle crash performance has been verified via a rigorous programme of 70 full vehicle crash tests and over 20 sled tests.

PASSENGER SEAT BELT CHECK SYSTEM

CURTAIN AIRBAGS WITH ROLLOVER SENSING

In the event of a side impact or rollover, these are deployed to provide greater protection against head injuries.

SEAT BELT PRETENSIONERS

Provide additional protection in the event of a front impact by reducing the forward movement of the occupant.

DUAL STAGE DRIVER AND PASSENGER AIRBAGS

In a severe impact, the airbags fully inflate to offer the highest levels of protection. In a lesser impact, they partially inflate.

62 *Feature availability varies by market.

ENVIRONMENTAL

SUSTAINABILITY

EFFICIENCY DRIVES SUSTAINABILITY

Range Rover demonstrates Land Rover's commitment to enhancing the sustainability of its products and operations and its determination to deliver vehicles which are both relevant and highly desirable. With its lightweight aluminium structure and optimised powertrains – including the Hybrid Diesel – Range Rover addresses the growing consumer need for more socially acceptable vehicles in a carbon-conscious world.

Its greener credentials stem from a comprehensive approach to reducing environmental impact throughout the life cycle of the vehicle; from development and manufacturing, to customer use and end-of-life.

SUSTAINABLE BY DESIGN, WITH LIFE CYCLE APPROACH

In order to minimise the vehicle's overall ecological impact, Range Rover is designed with a life cycle approach, aiming to minimise the environmental impact by considering the entire life cycle of the vehicle. Each element of the life cycle was analysed with a view to consuming fewer natural resources, using more sustainable materials and minimising the generation of waste. The development process has included a full life cycle assessment in line with ISO 14040/14044.

Range Rover's aluminium construction makes a major contribution to its reduced carbon footprint. Up to 50 percent of the aluminium material is sourced from recycled content, resulting in a significant saving of energy and CO_2 emissions. Recycled and renewable materials are used wherever possible in the Range Rover. High specification vehicles use up to 31.5kg of recycled plastics, diverting over 8,820 tonnes of plastic from landfill during the carline's life. Natural and renewable materials, such as the luxurious leathers and veneers, represent 44.5kg of each vehicle.

Bridge of Weir leather, produced in the UK using unique 'low carbon' and low water consumption manufacturing processes, adds further to the environmental credentials of the vehicle, while the real wood veneers are all sourced from sustainable forests.

INTELLIGENT STOP START SYSTEM

To ensure the greatest possible fuel efficiency, all Range Rover powertrains incorporate low-CO₂ technologies such as the advanced Intelligent Stop/Start system, which improves fuel consumption by between 5 and 7 percent. The system automatically shuts down the engine at rest and starts it again as soon as you lift your foot off the brake. It features a Tandem Solenoid Starter with a dedicated secondary battery for instant restarting.

Feature availability varies by market, engine and model. Please see the accompanying Specification and Price Guide for feature availability within market or contact your local Land Rover Retailer for more information. Vehicle shown left is Autobiography in Indus Silver with optional features fitted (market dependent).

PERSONALISING THE EXTERIOR - ACCENT PACKS

STANDARD FINISH* (BASED ON VOGUE MODEL WITH OPTIONAL FOG LIGHTS)

- Grille surround in Dark Atlas, grille mesh and ribs in Atlas
- Body-coloured vent blades and door handles
- Front bumper accents in Atlas
- Lower accent graphic in Atlas.

There is plenty of opportunity to tailor the exterior to suit your personal taste. In addition to the standard finish you can change the finish of the side vent graphic to Atlas or choose the Dark Atlas finish as part of an Exterior Accent Pack. These are also available as an accessory fitment. The Black Design Pack gives the overall design of the vehicle a more assertive appearance by changing individual elements to Gloss Black.

ATLAS SIDE VENT GRAPHIC*

- Grille surround in Dark Atlas, grille mesh and ribs in Atlas
- Body-coloured vent blades and door handles
- Front bumper accents in Atlas
- Lower accent graphic in Atlas
- Side vent graphic in Atlas.

*Model shown with optional 22" 5 split-spoke 'Style 504' alloy wheels [†]There are restrictions on exterior paint and roof colours with certain Accent Packs [†]Contrast roof in Indus Silver not available ^ASantorini Black door handles on Vogue. Santorini Black door handle surrounds on Vogue SE and Autobiography. Please refer to the accompanying Specification and Price Guide for applicability.

ABOVE & BEYOND

CHOOSE YOUR SEAT CONFIGURATION

Bench Seat

The leather bench seat can accommodate up to three passengers and is available with manual or power recline.

The centre seat folds flat to reveal the rear seat cupholders.

For extended load capacity all of the rear seats will fold fully forward. Additionally this can be operated electronically by the touch of a button in the loadspace for seats specified with power recline.

Available on Standard Wheelbase and Long Wheelbase variants. Not available on SVAutobiography Long Wheelbase.

88

SPECIFICATION

BUILD YOUR OWN

STEP 5 CHOOSE YOUR INTERIOR

Rear Executive Class seats

For the ultimate in rear seat luxury, the Rear Executive Class seating option provides supreme comfort and convenience, with two individual rear seats and the full extended centre console finished in the finest veneer. Seat functionality includes memory, power recline and a three-mode massage feature.

The option of a Long Wheelbase adds 186mm in the second row of seats and has the additional benefit of providing rear passengers with a recline of some 17 degrees.

Available on Vogue SE, Autobiography and standard on SVAutobiography Long Wheelbase. Also available on both Standard Wheelbase and Long Wheelbase variants.

Visit landrover.com to configure your vehicle online. 89

LAND ROVER APPROVED ACCESSORIES

Many owners want to add their own stamp of individuality by tailoring their Range Rover with a range of stylish, practical accessories that are tough, versatile and bring an opportunity for personalisation. One such addition is a Design Pack. This has been designed, developed and tested by our Special Vehicle Operations (SVO) team and is therefore engineered to the highest possible level.

Exterior features include a unique front bumper, rear bumper with integrated tailpipes, side vents, grille and side sill claddings.

Naturally, Land Rover Approved Accessories are designed, tested and manufactured to the same exacting standards as the original equipment fitted to your vehicle. And importantly, these accessories can be added at any stage during the vehicle's life.

102

STEP 6 CHOOSE YOUR ACCESSORIES

DESIGN

SVO Design Pack - Front and Rear Bumpers*

Purposeful, dynamic and stunningly realised lines are created with the addition of our Design Pack. The unique front bumper gives the vehicle even more presence. If you want your vehicle to make a greater statement, this does so with flair. Please note: off-road capabilities will be impacted due to amended approach and departure angles.

SVO Design Pack - Grille Surround and Side Vents*

Side vents, grille and side sill claddings add to its already unmistakable silhouette.

Please note: off-road capabilities will be impacted due to amended approach and departure angles.

SVO Design Pack – Exhaust Finishers*

The rear, with its integrated tailpipes, is equally confident.

Please note: off-road capabilities will be impacted due to amended approach and departure angles.

Deployable Side Steps**

These smart, practical steps make it easier to get in and out of the vehicle. Neatly stowed under the sills, the side steps automatically deploy as soon as the door is opened, or when activated by the key fob. They stow automatically when the door is closed. The side steps are sensitive to obstructions and will not deploy in off-road or low range settings. Please contact your nearest Land Rover Retailer for more information.

Bright Side Tubes VPLGP0100 (SWB only)

Highly polished stainless steel side tubes provide an off-road inspired appearance, designed to complement the vehicle's exterior design.

Fixed Side Steps VPLGP0226 (SWB only)

Complete with a rubber tread mat and brushed stainless steel trim, the fixed side steps provide easy access/exit to the vehicle's cabin and aids access to the roof. With embossed Range Rover branding, exterior Bright work and Bright Anodised Aluminium edge trim finish, they complement vehicle exterior styling cues.

*Items are not available individually

Vehicle shown left is Vogue in Fuji White with Black Design Pack and SVO Design Pack.

TOURING

Luggage Roof Box* VPLVR0062

Roof mounted luggage box with Gloss Black finish. Opens from both sides and is lockable for security. Includes power-grip mounting for easy and quick fixing to the roof bars. External dimensions: 1,750mm long, 820mm wide, 450mm high. Volume 410 litres. Maximum payload 75kg**

Sports Roof Box* VPLVR0061

Large Sports Roof Box* VPLWR0100 (not shown) Sleek, aerodynamic design sports roof box with a Gloss Black finish which can be mounted on either side of the vehicle for kerbside opening. Internal retention system for skis or other long loads. Lockable for security. External dimensions: 2,060mm long, 840mm wide, 340mm high. Internal volume 320 litres. Load capacity 75kg**.

Luggage Carrier* LR006848

Flexible rack system to facilitate roof carrying. Maximum payload 75kg**.

Loadspace Rails VPLGS0170

Loadspace mounted rails to help increase the flexibility of loadspace stowage, also allowing the fitment of the luggage retention kit stowage system.

Luggage Retention Kit VPLGS0171

Pack of attachments that fix into the loadspace rails via a quick lock/quick release system to help provide a flexible solution for retaining items. The attachment pack includes a retractable strap with inertia reel, telescopic rod and stowage bag.

Towing System – Multi-Height Tow Bar VPLGT0082, VPLGT0097, LR037931, LR037913

Multi-height tow hitch offers three different towing height positions and the ability to swap height easily Simple to fit/remove following initial Retailer installation. Includes 50mm tow ball. Approved for up to 3,500kg trailer load.

Towing Electrics – 13 Pin[†] VPLGT0073

13 pin towing electrics offered for use with deployable or multi-height tow bar. European-style towing electric, capable of supplying all trailer rear lighting and interior equipment power.

Accessory Wheels Consult Retailer

A range of wheels are also available as an accessory fitment. Some of the wheels shown are manufactured via premium forging process to ensure strength, with striking vibration polished finish.

*Roof rails and cross bars are required for all Land Rover roof mounted accessories. Objects placed above the roof mounted satellite antenna may reduce the 104 quality of the signal received by the vehicle and could have a detrimental effect on the navigation and satellite radio system, if fitted.

STEP 6 **CHOOSE YOUR ACCESSORIES**

SPORTING

Consult your Land Rover Retailer for further details

Roof rails facilitate easy fitment of cross bars for roof carrying. Pre-set positioning points ensure cross bars are fixed in optimum position for weight distribution and dynamics.

Cross Bars** VPLGR0102

Elegant, durable Bright finish aluminium cross bars, with T-track design which utilises the full length of the bars, providing space to mount multiple accessories. Aerodynamic profile minimises drag and wind noise. The incremental height when fitted is 93mm.

Ski/Snowboard Carrier* LR006849

Carries four pairs of skis or two snowboards and incorporates slider rails for easy loading, is also lockable for security. Maximum payload 36kg.**

Ski Bag VPLGS0166

The Land Rover padded ski/ snowboard bag carries up to two pairs of skis and poles up to 180cm long. It is manufactured from durable 600D polyester and features removable shoulder strap.

Aqua Sports Carrier* VPLGR0107

Carries one surfboard, sailboard, canoe or kayak. Includes lockable multipurpose holder to carry a mast, oars or paddles. Tilts to facilitate easy loading/ unloading. Features lockable straps and rubber supports to maintain optimum weight distribution whilst protecting the kayak and vehicle from scratches/ scuffs. Maximum load capacity 45kg.**

Illuminated Treadplates VPLWS0208 – SWB VPLGS0261 - LWB

Illuminated treadplates are available on both the driver and front passenger sides of the vehicle to welcome you into the cabin.

Personalised Illuminated Treadplates VPLWS0212 - Front VPLWS0209 – Vehicle Set (SWB only) VPLGS0262 – Rear (LWB only)

Personalise your vehicle further by adding a script of your choice in a variety of fonts, highlighted by subtle white illumination. Available as a full vehicle set (front pair personalised, rear pair illuminated only) or as a front pair only.

Sport Pedal Covers VPLGS0160

Alternative pedal covers for an interior design enhancement featuring a Bright finish. Manufactured from polished and etched stainless steel and features hidden fixings for a clean finish.

Tow Bar Mounted Bike Carrier VPLVR0067 – Two Bike (LHD) VPLVR0069 – Three Bike (LHD)

VPLVR0066 – Two Bike (RHD) VPLVR0068 – Three Bike (RHD)

Upper and lower tailgate can be opened with carrier in place. Features quick attach/release mechanism. Fits to either multi-height tow bar or electrically deployable tow bar. Manufactured from aluminium and other lightweight materials. Lockable for security. Maximum load capacity 40kg.

More information on Land Rover bikes is available online at: www.2x2worldwide.com

Visit accessories.landrover.com for more information. 105

INTERIOR

^{**}Maximum payload equals the load capacity of the roof mounted accessory

†Please note: These accessories are not suitable for caravans, trailers or lighting boards fitted with rear mounted LED Lamp Kits.

SPECIFICATION

LAND--ROVER ABOVE & BEYOND

A WORLD OF LAND ROVER

LAND ROVER ONELIFE

Onelife, the award-winning Land Rover magazine, is published twice a year and reaches customers in 40 countries. Each issue is filled with the latest Land Rover news and vehicles, insights into the technology and design that shape each vehicle, inspirational journeys and opinions from international experts.

LAND ROVER EXPERIENCE

Ever since its inception, Land Rover has been ready for anything. Its legendary capability has seen it tackle the most demanding of terrains, in the most difficult conditions. Its versatile interior has become synonymous with comfort and greater loadspace. And its 'can do' attitude has made it the most welcome of vehicles across the globe.

You can be part of the Land Rover story at one of our Land Rover Experience Centres. You can see how each and every one of these iconic vehicles is built. You can take one out onto off-road tracks where your driving skills will be put to the test. Or you can go even further on one of our Adventure Travel holidays to such countries as Tanzania, Iceland or Morocco.

Adventure awaits.

For more information, visit landrover.com/experiences

LAND ROVER FINANCIAL SERVICES

Getting the keys to your very own Land Rover has never been so simple. And it's more affordable than you might think. New or used, for personal or business use, we have an option that puts you in complete control. Please speak to your nearest Land Rover Retailer to find out more.

FLEET & BUSINESS

Land Rover is dedicated to being the premium manufacturer of choice for fleets and businesses, by providing a highly attractive range of vehicles and exemplary customer service.

Distinctive, capable and versatile, all Land Rover vehicles deliver low Total Cost of Ownership through strong residual values, competitive service, maintenance and repair costs, and impressive fuel economy and CO₂ emissions.

We are also committed to providing a totally customerfocused aftersales service, which will ensure every Land Rover vehicle is kept on the road and in top condition, in the easiest and most cost-efficient way for businesses.

For more information, visit landrover.com/fleet-and-business

LAND ROVER COLLECTION

The vehicle is just the beginning. The latest Land Rover Collection is now available for you to discover.

A meticulous attention to detail doesn't stop with our vehicles. You'll find the same level of craftsmanship in all of our clothing, travel items and premium gift ideas. So whether you're shopping for yourself or a loved one, you know the quality is assured.

The Land Rover Collection includes ladies and gents clothing, an extensive range of small leather goods such as wallets, portfolios, iPad and iPhone cases along with briefcases and weekender bags. A range of cufflinks and ladies silk scarves add a luxury feel to the collection. There's gear for the kids too, with colourful fun clothing, caps and replica model vehicles for them to enjoy.

Please contact your nearest Land Rover Retailer for more information.

LAND ROVER ROADSIDE ASSISTANCE

Land Rover Assistance provides assistance in motoring emergencies, from immobilisation due to breakdown or accident to minor problems such as punctures. You can rely on our roadside assistance, whatever the situation, wherever you happen to be.

For further details please consult your Warranty Benefits handbook, contact your nearest Land Rover Approved Service Centre or visit landrover.com/ownership IMPORTANT NOTICE: Jaguar Land Rover Limited is constantly seeking ways to improve the specification, design and production of its vehicles and alterations take place continually. Whilst every effort is made to produce up to date literature, this brochure should not be regarded as an infallible guide to current specifications, nor does it constitute an offer for the sale of any particular vehicle. Distributors and Retailers are not agents of Jaguar Land Rover Limited by any express or implied undertaking or representation.

All Land Rover Approved Accessories fitted by a Land Rover Retailer within one month or 1,600 kilometres/1,000 miles (which ever occurs first) of the handover of a new registered vehicle will benefit from the same warranty terms and period of cover as the vehicle warranty. Accessories purchased outside of these parameters will be subject to a 12 month unlimited mileage warranty. All Land Rover Approved Accessories are rigorously tested to the same exacting standards as those applied to our vehicles. Performance in extreme hot and cold temperatures, corrosion resistance, impact and airbag deployment highlight some of the exhaustive product testing carried out to ensure accessories are both durable and importantly, continue to comply with current legislation. Some of the accessories featured are not available on all models. Please consult your nearest Land Rover Retailer for more information.

All our accessories are designed to be an integral part of Land Rover vehicles. While many items such as roof carriers are simple to fit, some products require specialist tools and diagnostic equipment to ensure correct integration with the vehicle structure and electrical systems. These products vary from market to market, please consult your Land Rover Retailer who will be pleased to advise you on current specifications and any query you may have.

The colours reproduced here are subject to the limitations of the printing process and may therefore vary slightly from the actual vehicle. The company reserves the right to alter or withdraw any colour finish without notice. Some of these colours may not be obtainable in your country. Please check availability of colours and current specifications with your Land Rover Retailer. Distributors and Retailers are not agents of Jaguar Land Rover Limited and have absolutely no authority to bind Jaguar Land Rover Limited to any express or implied undertaking or representation.
